Trinita Highlights Oracle® Advanced Planning Value at Oracle AppsWorld

Trinita to Present and Exhibit Oracle Implementation, Integration and Support Expertise in San Diego

SAN DIEGO, Calif., January 20, 2004 – Trinita Corp., a leader in business process consulting, services and engineered solutions for the technology manufacturing and semiconductor industries, will present an implementation perspective on Oracle® Advanced Planning at the upcoming Oracle AppsWorld 2004 conference, January 26 - 29 in San Diego.

“Companies who are trying to create successful planning solutions without all of the right components, are struggling,” says Hari Krishnan, Trinita Solution Architect. “Using a combination of business experience and technical knowledge, Trinita has effectively brought cutting-edge Oracle Advanced Planning solutions forward for global manufacturing customers. Together, Oracle and Trinita deliver real-time business information to empower effective decision making.”

Oracle AppsWorld is a conference and exhibition completely dedicated to Oracle E-Business Suite strategies, business processes, and technical directions. Krishnan will be presenting a technical evaluation of Oracle Advanced Planning on Thursday, January 29, at 3:30 p.m. The session will address what it takes to successfully integrate and implement supply chain applications and will include past implementation success stories. Trinita, a certified partner in the Oracle PartnerNetwork, will also exhibit in booth #204 at the event.

Trinita provides products, services and solutions that help global companies improve productivity and optimize supply chain performance. Trinita solutions tie together disparate business data and systems, giving customers a consolidated, real-time view of enterprise-wide activity.

Trinita uses a disciplined approach to project management that helps the team accommodate evolving business considerations during the configuration and integration of enterprise resource planning (ERP); APS; and packaged or legacy manufacturing execution systems (MES). This unique approach provides cost-effective implementations that meet the original project requirements on time and on budget.

About Oracle PartnerNetwork

The Oracle PartnerNetwork is a global business network of more than 12,000 companies who deliver innovative enterprise software solutions based on Oracle (Nasdaq: ORCL) software. Through access to Oracle’s premier products, education, technical services, marketing and sales support, the Oracle PartnerNetwork provides partners with the resources they need to be successful in today’s Internet

economy. Oracle partners are able to offer customers leading-edge solutions backed by Oracle's position as the world's largest enterprise software company. Partners who are able to demonstrate superior product knowledge, technical expertise and a commitment to doing business with Oracle qualify for the Oracle Certified Partner level. These partners receive a higher level of service, support, training and certification from Oracle.

About Trinita

Trinita delivers business process consulting, services and solutions for the high technology manufacturing and semiconductor industries. The Trinita team of global professionals applies knowledge and understanding of both technology and business possibilities during effective real world implementations. Trinita solutions include consulting, application development and system integration. Trinita is a certified member of the Oracle PartnerNetwork and is also an SAP Service Partner.

Trinita customers include global technology companies such as Amkor, Qualcomm, Sony Semiconductor and Sun Microsystems. The company is headquartered in San Diego, Calif., with international operations in Europe, India and Japan. For more information about Trinita, visit their Web site at www.trinita.com or call toll free at 1-888-248-3400.
