### **Trinita Extends ERP Value With Unique Integration Solutions for SAP® Exhibited at SAPPHIRE® 2004**

#### **Trinita Exhibits Consulting and System Integration (CSI) Solutions for Semiconductor Manufacturing in New Orleans, Louisiana**

**NEW ORLEANS, May 11, 2004** – Trinita Corp., a leader in business process consulting, services and engineered solutions for the technology manufacturing and semiconductor industries, is demonstrating competitive supply chain solutions for users of SAP® solutions at SAPPHIRE® 2004, the international SAP customer conference, held May 11-13<sup>th</sup>.

As a member of the SAP Software Partner program with certified integration to SAP solutions, Trinita combines specialized experience in the development, implementation and integration of business process solutions with the powerful master data management capabilities of SAP solutions. Because of deep vertical industry expertise in semiconductor and technology manufacturing, Trinita professionals create added value for SAP customers from their new or existing SAP implementations.

“Using a combination of business experience and technical knowledge, Trinita effectively delivers actionable information to key supply chain decision makers,” says Jeff Slosar, President of Trinita Corporation. “As an SAP Software Partner, we convert data into useful and practicable information thereby empowering SAP implementations with timely, reliable, accurate and complete information.”

A premier international event that brings senior executives together to explore innovative business solutions, SAPPHIRE 2004 offers attendees a unique opportunity for education on the value of SAP solutions across the enterprise. Trinita will exhibit in pod #1733B located by the Manufacturing Hall.

Trinita provides products, services and solutions that help global manufacturing companies improve productivity and create competitive supply chain performance. Trinita solutions employ advanced technology to channel accurate and reliable data into functional business processes. Trinita solutions give customers the ability to actively drive their business rather than react to business drivers.

Trinita consultants use a disciplined approach to project management to accommodate evolving business considerations throughout the configuration and integration of enterprise resource planning (ERP); advanced planning and scheduling (APS); and packaged or legacy manufacturing execution systems (MES). This unique approach provides cost-effective, modular implementations that meet evolved customer requirements accurately and efficiently.

### **About Trinita**

Trinita delivers consulting and systems integration (CSI) solutions for the high technology manufacturing and semiconductor industries. The Trinita team of global professionals applies knowledge and understanding of both technology and business possibilities during effective real world implementations. Trinita solutions include products, consulting, integration, implementation, application development and support. Trinita is a member of the SAP Software Partner Program and a member of Americas' SAP User Group (ASUG).

Trinita customers include global technology companies such as Amkor, Qualcomm, Sony Semiconductor and Sun Microsystems. The company is headquartered in San Diego, Calif., with international operations in Europe, India and Japan. For more information about Trinita, visit their Web site at [www.trinita.com](http://www.trinita.com) or call toll free at 1-888-248-3400.
